Forecast for Sunday 11 Dec 2022

Weather: Rather cloudy with isolated wintry showers during the morning. Gradually becoming drier into the afternoon with cloud breaking from the west to give some clearer spells to end the day. Remaining cold at all levels with valley temperatures only briefly above freezing through the middle of the day.

Chance of cloud-free hill tops above 800m: 60% becoming 90% by late afternoon.

Low Cloud and visibility: Widespread cloud in the east between around 400m and 800m during the morning, lifting slightly and becoming more isolated for all areas through the afternoon. Visibilities generally good, quickly becoming poor or very poor in any isolated showers with cloud bases also likely to drop in association, and very poor within cloud at height.

Freezing Level*	00m	00m	200m	100m	00m	00m	00m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions more challenging early with occasional hill fog. Little thawing should be expected through the day even at low levels given the low temperatures with icy ground at all levels possible. A significant chill effect possible despite light winds.

Forecast for Monday 12 Dec 2022

Weather: Continuing cold, largely dry with good periods of weak sunshine, but a few isolated light snow showers cannot be ruled out.

Maximum wind: East 15mph or less

Chance of cloud-free hill tops above 800m: 90%

Low Cloud and visibility: Generally little cloud though some low startus and fog possible below around 200m, this clearing only slowly into the afternoon. Visibilities generally good but very poor within cloud and likely to drop quickly in any isolated showers.

Temperature: **Valleys:** Minus 2 Celsius increasing plus 1 Celsius early afternoon
At 800m: Minus 4 Celsius
Freezing level: Surface to 200m
